

# *Mr. G's Math Marvels*

**Theme:** Mathematics skills

**Lesson:** Geometry/Angles

**Facilitator:** Gary Walton, Mr. G., BECON Studio Teacher

---

## Lesson Plan

---

**Grade Level:** 3

**Sunshine State Standard:** MA.B.1.2.1, MA.B.1.2.2, MA.C.1.2.1,

**Objective:**

1. Students learn the four basic types of angles used in elementary school:
    - A. Acute
    - B. Right
    - C. Obtuse
    - D. Straight
- 

**Activity:** Using Handouts #28A and #28B:

1. Students review the four basic types of angles.
2. Students are shown how the rotation of an angle does not change its size.
3. Students identify the different types of angles using various colored crayons.
4. Students look around room and find examples of right angles.

**Materials Needed:** Handouts #28A and #28B, four crayons: green, red, orange, and purple.
